Most of the Chinese language books on the market are from China, and are written specially for Chinese children in China.

Nowadays with the growing economic power of China, we are aware that the Chinese language is very important for our children to learn.

If we use traditional Chinese methods to teach our kids Chinese, it will not work! Because these Chinese books from China are designed for the Chinese kids who are already familiar with the sentence structure and have a certain level of proficiency in the language.

The reason why our children are still having difficulty speaking Chinese even though they have learned Mandarin for years is because we use books designed for Chinese kids in China.

This book is written from an English perspective and explains the rules that make Chinese sentences simple. Children will learn to speak Chinese very quickly and easily.

This curriculum follows the patterns of scientific language development and helps our children learn Chinese effectively and efficiently.
